

# ACT<sup>®</sup> WorkKeys<sup>®</sup>

## Applied Math Assessment

Designed to measure critical thinking, mathematical reasoning, and problem-solving techniques needed in today's workplace.

### Why the Applied Math assessment is a part of our admissions process:

At Golisano Institute for Business & Entrepreneurship, we've found that Applied Math assessment scores of 4 or higher predict greater rates of success in our business courses, such as Business Math, Financial Accounting, and Managerial Economics.

### What to expect during the assessment:

- Determining simple ratios, proportions, and rates
- Adding and subtracting fractions, decimals, and percentages
- Calculating the mean or average of a set of numbers
- Working with volumes, weights, and measurements

### Accommodations and Support:

Our Admissions Team and Student Support Team members are available to ensure students' testing needs are met. Reach out to Admissions Recruiter, Rebeca McGwin, at [rmcgwin@golisanoinstitute.org](mailto:rmcgwin@golisanoinstitute.org) with questions or requests for more information.

- Students can retest once every 30 days.
- Create an account at [success.act.org](https://success.act.org) to access a free practice test.
